

SITE INSPECTION REPORT

Inspection Date(s) 1/25/93

Site Name: Tutu Wells Site

Site Address: _____

Persons Conducting Inspection:

(Identify EPA, State, Contractors, PRPs, Public, etc.)

L. Reed, DPNR

Mr. & Mrs. Steele, Steele well

Mr. Dennis Cuun, Smith Well

Ms. Jones, Mathias Well

Caroline Kwan, EPA

Purpose of Inspection:

(Survey, data collection, field work, progress evaluation, etc.)

We met with each well owner to discuss the alternative of continuing providing water through trucking versus connecting their wells to the WAPA water main. We informed them the Pros and Cons of WAPA connection and the costs involved. EPA will not pay for water or the maintenance of the lateral extension once it is connected. It is up to the

home owner to pay for any water usage and pipe maintenance after the defendants (Texaco, Esso, L'Henri) paid to have Majestic Construction to connect the extension. We also explained the unreliability of WAPA to provide water. We explained the trucking water alternative to them. The defendants will provide trucked water like they were doing for the last two years until the water (aquifer) is usable again for their primary use (potable). They will set money aside in an escrow account to pay for the water for an indefinite amount of years.

Findings, Accomplishments, and Results:

Mr. & Mrs Steele, and Mr. Dennis Cuun stated that they rather continue with the present arrangement, which is trucked water. They will forward their responses to Mr. Reed with courtesy copy to me.

Ms. Jones, whose is the daughter of Ms. Mathias' well stated she wants to speak with her attorney since they are suing the defendants already. She will get back to us by 2/12/93.

Ms. Harvey was out of state. Mr. Reed agreed to follow-up with her when she comes back to VI.
